

Year 1 Maths Lesson

Teaching notes for adults:

The learning objectives for today are:

- To know number bonds to 9.
- To recognise that addition can be done in any order.

There is a practical activity and a worksheet for you to do with your child.

What you will need:

- Something to use for cubes (9) and a small bag
- Paper and a pencil
- Worksheet

Activity:

- Put 9 cubes (or any other small objects) into a bag.
- Ask your child to take some cubes out of the bag.
- They count the cubes and place them in the middle of the table, e.g. 5. *There were 9 cubes in my bag, how many cubes will be left now?*
- Child writes the answer on their whiteboard/paper, using their fingers to help if necessary.
- Discuss their answer and then count out the remaining cubes and place them in a pile next to the first pile.
- *How can we make a number sentence out of this?* $5 + 4 = 9$ and $9 - 5 = 4$.
- Repeat, putting all the cubes back in, then choosing a new amount to take out.

L.Os: To know number bonds to 9; To recognise that addition can be done in any order.

Birthday number bond candles

Sheet 1

How many more candles to make 9? Finish each number sentence.

		
2 + <input type="text"/> = 9	5 + <input type="text"/> = <input type="text"/>	<input type="text"/> + <input type="text"/> = <input type="text"/>

		
<input type="text"/> + <input type="text"/> = <input type="text"/>	<input type="text"/> + <input type="text"/> = <input type="text"/>	<input type="text"/> + <input type="text"/> = <input type="text"/>

		
<input type="text"/> + <input type="text"/> = <input type="text"/>	<input type="text"/> + <input type="text"/> = <input type="text"/>	<input type="text"/> + <input type="text"/> = <input type="text"/>
