

## Year 2 Maths Lesson

### Teaching notes for adults:

The learning objective for today is:

- To be able to use number facts or place value to add and subtract.

There is a practical activity and a worksheet for you to do with your child.

What you will need:

- Paper and a pencil
- 1 to 100 number grid (*provided*)
- Sorting calculations sheet (*provided*)
- Worksheet (*provided*)

### Activity:

- Give your child the 'Sorting Calculations' sheet.
- Child looks at the calculations on the sheet.
- They re-write the calculations in the 2 sets, according to how they would solve each one.
- Work together to find the answers for each set.

### Challenge:

Which of these calculations can Amie do because she knows that  $7 + 2 = 9$ ?

19 - 2    27 + 5    17 + 2    32 + 7    42 + 9    39 - 7    59 - 2

L.O. To be able to use number facts or place value to add and subtract.

Sorting calculations

$45 - 4$

$23 + 4$

$60 + 8$

$84 + 4$

$17 - 7$

$54 - 4$

$30 + 6$

$28 + 1$

$20 + 3$

$58 - 2$

$33 - 3$

Number facts

Place value

L.O. To be able to use number facts or place value to add and subtract.**Card Race**

## Sheet 2

- Choose two cards.
- Now do your 1<sup>st</sup> two calculations:
  - a) Add the two numbers. Record the addition in the top space.
  - b) Find the difference between the numbers. Record the subtraction below the addition.
- Choose a different pair of cards for the 2<sup>nd</sup> pair of calculations.
- Challenge yourself to win a cup!

1 <sup>st</sup> pair of calculations	2 <sup>nd</sup> pair of calculations	3 <sup>rd</sup> pair of calculations	4 <sup>th</sup> pair of calculations	5 <sup>th</sup> pair of calculations	6 <sup>th</sup> pair of calculations	7 <sup>th</sup> pair of calculations
a) $11 + 5 = 16$	a)	a)				
b) $11 - 5 = 6$	b)	b)				
	a)	a)				
	b)	b)				
	a)	a)				
	b)	b)
