

Science - What do we know about the weather?

Notes for parents:

The teacher talks about an introduction quiz, but there isn't one! At one point she talks about daffodils and daisies outside because this lesson was recorded during the first lockdown - you may want to explain this to your child. There are **lots** of activities in this lesson so please spread the lesson and each activity out over the whole week. I have made sheets for each of the activities, but your child can just do each task on a piece of paper if you don't want to print all of my sheets out. Please send me a picture of your child's completed activity, in whichever format you choose, on Dojo each day. Thank you

Science - What do we know about the weather?

Watch the lesson and follow the instructions for each of the activities.
