

Theme Lesson (Science)

Learning Objective:

- To raise children's awareness of everyday appliances which use electricity (these include things that light up, heat up, produce sounds and move).

What you will need:

- Unwanted catalogues / magazines / promotional material from electrical shops to cut images of everyday objects and electrical appliances or some similar images printed from the internet
- Scissors and glue
- A template of a house (provided)

Activity:

1. Look around your home and find objects that use electricity and those which do not.
2. Look through catalogues/magazines etc. (or search for images on the internet) with your child and ask them to pick out some objects which use electricity.
3. Cut out some pictures together.
4. Ask your child to glue their cut out pictures in the different rooms on the house template provided.
